ANTI-FRAUD REMOTE CASH TRANSACTION SYSTEM COMPARISON CHART (Date: August 12, 2003)

Patent Description	Payer opens an account with Remote Payment System ("RPS") linked to payer' financial account.	Payer records payee's identification information and payment amount into the RPS.	RPS issues a Transaction Identification Number ("TIN") linked to the payment.	Payee requests payment from RPS terminal with a machine- readable identification card based on TIN.	RPS issues cash payment to the payee if the embedded info from ID card matches the records linked to TIN.
